Programming for Beginners – 24 April 2016

Problem 3. Strawberry

Your task is to write a program, which **reads a number N** from the console and **draws a strawberry**, which **size depends on N**. See the examples below to understand your task better.

Input

On the only input line you will be given the positive number N – odd number in the range [1 ... 17]

Output

The output should be printed on the console. Use the "#" (number sign) for the outlines of the strawberry, "." for the inside of the strawberry. For the leaves: left ones – "\", middle ones – "\" and right ones – "\"

Examples

Input	Output	Input	Output	Input	Output
5	\/\ /\ /##########	7	\	9	\
